Chief Engineer states that these designs are suitable enough.

As regards the Kolar Mission Institutions, H H has observed that more use might be made of the experience gained by the Mission in connection with Kindergarten work and technical instruction. The D.I. states that the experience gained in Kindergarten work by the Mission has been utilized by employing Miss Hurt, the Dance lady who worked under the Mission, as Kindergarten Instructor for a year. As regards the experience gained in technical instruction in the Kolar Mission Ind. School, the D.I. states that it will not be of much use to the Deptt as the School is conducted on trade principles.

NOTE—Contin sheet.

GPH—No 609—17-3-07

Submitted to His Highness

In the notes of His Highness' last Provincial tour His Highness was pleased to specially notice the following matters connected with the Education Department -

(1) The unsuitability and inadequacy of the existing school accommodation,
(2) The question of making more use of the experience gained by the Kolar Mission Institutions in connection with Kindergarten work and technical instruction,
(3) The absence of qualified mistresses in Girls' schools, and
(4) The question of improving the position of school masters

I submit for His Highness' information the report of the Inspector General of Education in regard to these several matters

The action taken in regard to these matters has been before His Highness recently, but I summarise below what has been and is proposed to be done

As regards school accommodation, His Highness considered it most desirable that a comprehensive scheme of improvement should be prepared, and up to date and well designed type designs sanctioned for schools of different sizes, and a definite policy formulated and strictly pursued The Inspector General of Education states that the annual allotments for school buildings are insufficient, that the condition of

schools is very bad in the villages and that unless a sum of Rs 1,50,000 is provided annually for the next 15 years, it is not practicable to suitably accommodate the schools The provision of such a large amount does not appear to be practicable, but as already reported, a sum of Rs 36,110 for Village School Buildings and of Rs 15,000 for Taluk School Buildings has been provided in this year's Budget, and every effort will be made to provide as large sums as possible for school buildings in the budgets of future years In Government Proceedings dated 12th December 1899 five standard type designs for village school buildings were sanctioned and the buildings recently constructed are in accordance with one or other of these designs I have also asked the Chief Engineer to arrange to have new type designs prepared for schools and other public buildings, with the assistance of Mr B P Raghavalu Naidu, Palace Executive Engineer

As regards the second point noticed by His Highness, the Inspector General reports that Miss R Hart, the lady that worked in the Kolar Mission Girls' School, has been employed as teacher and organiser of Kindergarten work for about a year and that her work at Bangalore has been satisfactory He thinks that the experience gained in technical instruction in the Kolar Mission Industrial school is not of much value to the Education Department as the school is conducted on trade principles

Regarding the absence of qualified mistresses the Inspector General recommended an annual provision of Rs 1,500 in the Education Budget towards the cost of replacing male teachers by female teachers, as the latter have to be paid at higher rates, and this sum

10

has been provided in the current year's Budget.

The question of improving the position of school masters has also been recently before His Highness The pay of the village school masters has just been raised to Rs 10 per mensem, and the Inspector General promises to send proposals for improving the position of teachers of vernacular middle schools and Anglo-Vernacular schools, as also of teachers in Education class D

13th November 1907

Dear Sir

I am desired to invite attention to the diary of His Highness the Maharajah's recent tour in the Bangalore, Kolar and Mysore Districts, a copy of which is understood to have been forwarded to You by the Private Secretary to His Highness I am directed to invite particular attention to the matters pertaining to Your department which attracted His Highness' attention and are noted in the accompanying memorandum, and to say that Government will be glad to have Your views and proposals in due Course officially, on those subjects for Consideration at an early date

Yours Sincerely
SD C Balasundara

To H J Bhabha Esq
Inspector General of Education in Mysore

Copy

Memorandum

School Accommodation –

His Highness was impressed by the General unsuitability and inadequacy of the accommodation provided. Most of the better buildings are about 40 years old and far too small for present requirements. Even where, as at Malvalli, the school house has been recently built it would seem to have been designed without any reference to the actual number of pupils requiring accommodation. The overflow buildings provided are usually ill-lighted and generally unsuitable. These remarks chiefly to the Anglo-Vernacular Schools visited. The case of other schools, Girls', Hindustani and Telugu is still worse. The Girls' school at Gulbarga is accommodated in a building that is a disgrace to the town. At 4 O'clock in the afternoon it was almost impossible to see to read in it. His

His Highness is fully aware of the magnitude of the task of providing satisfactory school buildings, but he is most strongly impressed with the present unsatisfactory state of affairs and he considers it most desirable that a comprehensive scheme of improvement should be prepared, up-to-date and well-designed type designs sanctioned for schools of different sizes and a definite policy formulated and steadily pursued. He considers that, when a new school is built, it should not only provide for existing needs but also for reasonable future requirements.

Kolar Mission Institutions. His Highness is disposed to think that more use might be made of the

experience gained by the mission in connection with Kindergarten work and technical instruction

School Mistresses The absence of qualified mistresses, indeed of mistresses of any description in the Girls' Schools, is in His Highness's opinion a regrettable ~~future~~ feature in the Districts visited. He trusts that every effort will be made to replace the masters by mistresses as they become available.

Pay of Schoolmasters His Highness is aware that this subject is a source of constant concern to Government. He will always welcome any measures that Govt can see their way to propose for improving the position of these most deserving and poorly paid men.

~~Bangalore,~~ Camp ootacamund, 7th may 1908

GOn 221-07
Sl-23

From

H J BHABHA Esq M A
Inspector General of Education in Mysore

To

C S Balasundaram Iyer Esquire, B A
offg secretary to the Government of mysore,
General & Revenue Department

Sir,

With reference to your D O letter dated November 13, 1907 calling for my views and proposals on the matters relating to the Educational Department which attracted His Highness' attention during his recent tour in the Bangalore Kolar and mysore Districts, I have the honour to submit my views below

with reference to His Highness' remarks on accommodation in the schools of the state I have for many years past been representing to Government the wants of the Department in the matter of buildings

and accommodation with all the earnestness I can command The amounts sanctioned for buildings in the Educational Budget is barely sufficient for the wants of one Taluk for instance, for the current year 1907-08 a sum of only Rs 10000/- has been provided for School buildings in the State Fund Budget, while for completing the incomplete buildings alone which were commenced in the previous year a sum of Rs 21,508 was required, the amount estimated for new buildings urgently required was Rs 19,149, and a sum of Rs 4,000 was required for repairs alone during the year Similarly in the Village School Fund Budget Rs 15,000 has been provided for buildings for 1907-08 while the incomplete buildings of the previous year required Rs 11,595, and the estimate of new buildings urgently wanted came to Rs 27 689, and a sum of Rs 4,000 was required for repairs This is not a solitary instance year after year the same story repeats itself and the Amount provided

for buildings is far short of the actual requirements sometimes I have to report to Government that buildings are actually in a dangerous state and are likely to come down if not immediately repaired or rebuilt In the current year two Taluk buildings are in a tumble-down condition, viz, the Taluk school at Manoya and the girl building at Chetalai-X-Drug on which the Hindustani school and the lower classes of the Anglo-Vernacular school are held, but to my regret funds are not available to repair or rebuild the schools

(The Manoya School + girls' have since been sanctioned by Government in their Order No. 10956-9 Edn 35-07-6 & 28-4-08)

3 The amounts sanctioned for School buildings during the last ten years in the Educational Budget are as follow -

year	State fund	Village school fund
1898-9	35 000	10000
1899-900	30,000	40,000
1900-01	30,000	25 000
1901-02	25 000	32 500
1902-03	20,000	16,000
1903-04	20 000	15,000
1904-05	10,000	15,000
1905-06	10,000	15 000
1906-07	30,000	20,000
1907-08	10,000	15,000

In addition to the amounts provided in the Education Budgets, the public Works Department Spent Considerable sums on College and High school buildings. The above amounts may not look small at least in some years, but they are really too small for the requirements of more than 1900 schools

4 There is the further difficulty of a very cumbrous procedure in getting village schools taken in hand I have to wait till about september 15, to hear how much provision the Chief Engineer requires for incomplete buildings of the previous year. This information he is unable to furnish till about the third week in September. After the wants of the incomplete buildings are satisfied, I have to select a few new buildings and submit their plans and estimates for the Sanction of Government. The printed estimates of village schools are not accepted by the Executive Engineers and are in every case Considerably enhanced by them. The obtaining of government Sanction and Satisfying the Government on the points they raise takes again a lot of time. When at last the village school buildings and their estimates are

are sanctioned we are well advanced into the middle of the official year and often into January, and the sanctioned works are not fully carried out for one reason or another before June 30 Thus while in the first instance the grants made by Government are small they are further reduced by the amounts that lapse when the allotments are not fully worked out before the end of the official year

5. If School accommodation at Taluk stations is bad enough, it is much worse in Villages The first two Directors of public instruction ruled that Villagers should supply buildings for the school and for the dwelling house of the school master before a school could be sanctioned In some cases the Villagers built a kutcha building which was bad in point of light and ventilation and sanitation generally and which barely lasted for more than a few years In most cases they provided accommodation for the school in a temple, Chavadi or Chatram which in nearly every case was very unsatisfactory I have endeavoured since 1890 to improve accommodation as far as the limited funds placed at my disposal could allow

6. In 1897, I prepared for the information of Government a memorandum on the needs of the School accommodation, both in Taluk stations and in Villages, and have appended two tabular statements giving detailed information. Improvements and extensions were estimated on a most economical scale and yet the urgent wants of Village schools amounted to Rs 1,70,000 and those of Taluk Schools to Rs 2,45,000. Government passed orders on my memorandum stating that "suitable provision for the more urgent buildings chargeable to state funds may be proposed from time to time in the annual Budget which will be duly considered and dealt with by Government along with the requirements of other Departments of the state, and while expressing their inability to make any special state grant for village school buildings, Government will not object to proposals being made in the Village school fund Budgets of the next and succeeding years for the utilization of so much of the cash balance at the credit of the Village school fund as can be usefully spent upon the construction, extensions

extension and improvement of Village Schools"
I submit herewith a printed copy of my memo and the
order of Government upon it I also prepared plans and
estimates of improved buildings for Village and Taluk
Schools in connection with my memo The estimates
were revised by the public works Department more than
once under the orders of Government and have been
brought down to the lowest limits possible As the result
of my memorandum of 1897, the above mentioned
allotments were made by Government from year to year
and two lists of buildings, which have been constructed
during the last ten years according to the type plans
for Taluk and Village schools are appended to the
letter It will be seen that altogether only 13 Taluk
School buildings and 40 Village schools of the new
types have been constructed during the last ten years
There are altogether 314 Taluk schools maintained
from state funds and 1485 schools maintained from
the Village school fund In these numbers Colleges,
High schools and special schools are not included
The task of providing suitable buildings for all or
most of these schools is stupendous moreover

the revised curricula and kindergarten methods of instruction will require further alterations and extensions in the type plans to provide Chiefly an assembly hall for each school unless a sum of Rs 1,50 000 is provided annually for buildings in the two Budgets together during the next fifteen years the schools in the state cannot be accommodated in suitable buildings Naturally the attendance in schools should grow from year to year and while providing buildings for the old schools, Government have to provide accomodation for the newly started schools as well as for the growth of attendance in the old Schools The attendance in public institutions was 82,645 on 30th June 1899 it was 100,655 on 30th June 1906 This increase occurred in spite of the ravages of plagues in the state

7 That the above estimates of an annual provision for buildings is not extravagant can be seen from the fact that the London County Council estimates the cost of School buildings at £12 to £15 per head of attendance in mysore, at present it varies from Rs 12 to Rs 22 or 16/S to 22/S per head The Education Commission appointed to enquire into the wants of

connection with the Famine Statistics in 1892, recommended that not less than Rs 3-6-/- per head of attendance should be spent on buildings of primary schools

8 I would add a few words about the buildings unfavourably commented upon in Mrs Inglesses' notes The new School house at Malkapuram is midway between the Fort which contains the whole Brahmin population and the pettah which contains chiefly the other castes parents of both the Fort and the pettah strongly objected to send little children so far as the new buildings, which was therefore designed for the Upper primary and Middle classes only and the Lower primary classes as well as the girls' School had to be accommodated in such rented houses as could be procured in the Fort

9 The Anglo-Vernacular School at Mulbagal was until lately in an unsafe condition for want of funds to carry out the necessary repairs It has however been recently repaired Funds have not been available for providing the Telugu and Hindustani Schools and girls' school in Mulbagal with better buildings

10. The girls' school building at Chintamani was until lately a rented building which was one

of

of the worst examples of a Taluk School building in the State. The want of better accommodation for it I felt in the early months but I have not yet been able to find funds for a new and suitable structure.

11. The Kolar Girls' School building is equally bad but I have found it impossible to procure a better house for rent till now and funds were not available for a new structure, though the people have I believe, contributed about Rs 9 000/- towards the cost. A few days ago however the only other house available in the town for a large School has been engaged for the Girls' School. It is slightly better than the present School house. The Kolar Taluk Kannada and Telugu Schools are also badly housed for want of funds.

12. With reference to His Highness' remarks about utilising the experience gained by the Kolar Mission in connection with Kindergarten work, Government have been good enough to sanction the employment of Miss R Hart, the same lady that worked in the Kolar Mission Girls' School more than two years ago, as Teacher and organiser of Kindergarten work for about a year in the Schools of Bangalore and Mysore City. Her work for the last two months in Bangalore has been very satisfactory, and I am hopeful that she will organise satisfactorily the

Kindergarten instruction in the Kolar Mission Girls' School

the kindergarten work of the Maharanis College and the Normal school in mysore and also probably of the Wesleyan Mission Victoria Girls School

Technical instruction in the Kolar Mission Industrial school

13 I fear the experience gained in technical instruction in the Kolar Mission Industrial school was of much value to the Department in as much as the Industrial School is conducted on trade principles as a large work shop supplied with excellent labour saving machinery imported from America which the ordinary artis-ans of Mysore will not, I am afraid, be able to purchase for a long time to come The work produces excellent furniture no doubt, but the learne or apprentices receive training in only special parts of their work and become themselves parts of a complex machinery as it were The opportunities of making a finished article with ordinary tools are none or few while there is no systematic teaching of mechanical drawing or design On this subject, I am making a separate reference to Government in connection with the increased grants asked for by the Rev W H Hollester

Employment of more school mistresses

16 I deplore the absence of qualified mistresses chiefly in the District Girls schools

as much as His Highness it would be well if a provision of Rs 125 a month at least is annually made in the Budget for the employment of female teachers as they have to be paid at higher rates than the ordinary male teachers If this is done, the number of female teachers can be increased gradually A proposal for a special allotment every year for the employment of additional female teachers has been already made in connection with the Budget of 1908-09

I Government have very kindly raised the pay of Masters pay of masters receiving less than Rs 10 by one rupee from October 1907 and proposals have been already submitted for raising the pay to Rs 10 in each case in the coming year The grades and salaries of teachers of Vernacular Middle and Anglo Vernacular schools, however, urgently require improvement and revision, as also the pay of teachers in Class D I strongly recommend that the pay of these teachers should be raised even at the cost of closing two of the weakest High schools and reducing the Scale of pay of teachers in the higher grades, if Government are unable otherwise to improve the very Scanty emoluments of the teachers mentioned above I shall be glad to formulate my proposals, should Government so desire

I have the honor to be,
Sir,
your most obedient servant

H J Bhabha
Inspector General of Education

Provincial tour in the Bangalore Kolar and Tumkur Distts.

Order thereon

No. 3460-62 / Ed 221-07-23 2-10-08

His Highness was pleased to specially notice the following matters connected with the Edn. Deptt. during his Recent provincial tour —

1) The insanitability and inadequacy of the existing School accommodation

2) The question of making more use of the experience gained by the Kolar Mission Institution in Connection with Kindergarten and

GRS 27]

GENERAL AND REVENUE SECRETARIAT

(*Continuation Sheet draft form*)

Technical instruction

3) The absence of qualified mistresses in Girls' Schools

4). The question of improving the position of School masters

2 As Regards School accommodation, the Govt- Consider that the existing type designs should be ~~revised~~ replaced by new ones the new designs should provide accommodation not only for existing needs but also for Reasonable future Requirements. The Chief Engineer is Requested to take the necessary action in the matter in Consultation with the Dy Sec of Govt and

MGCH—30 000—5 40

and send up fresh designs
to work for approval at an
early date He should also
consult the Sanitary Commit-
as Regards provision for
light and ventilation and
Sanitary and hygienic
Requirements Generally

2. Needful action
has been taken Regarding
the other matters referred
to Noticed by His Highness.
